Thinking about an apprenticeship in construction?

Think Y Prentis!

YPRENTIS

SHARED APPRENTICESHIP SCHEME

CYNLLUN PRENTISIAETH AR Y CYD

Y Prentis is a construction based shared apprenticeship programme operating across South East Wales. Supported by the Construction Industry Training Board (CITB) and Welsh Government, we employ apprentices across many trades.

"An apprenticeship gives you the benefit of learning in both a classroom environment and out on site - and you're getting paid for it too! You learn from people who have worked in the industry before and the opportunities it leads to are great. I've learnt a lot through college, university and by working with Encon Construction and it's put me in good stead for the rest of my career."

Gabriel Williams, Quantity Surveying Apprentice

"Y Prentis provided me with the opportunity to work with lots of different companies throughout my apprenticeship, giving me experience of the different ways they work and the various systems that they use to complete their projects. As well as helping me gain lots of hands on experience and improving my knowledge and skills of the trade, it helped boost my confidence and communication skills within the work place."

Daniel Hearse, Bricklaying Apprentice

Why become an Y Prentis apprentice?

Earn while you learn!

As an apprentice with us you will earn £160 per week in your first year and the National Minimum Wage in your second year. All of our apprentices spend four days on site and one-day a week at college working towards a qualification in their chosen trade.

Choose from a variety of trades

We offer apprenticeships in a number of trades, including:

- Bricklaying
- Carpentry
- Plastering
- Painting and decorating
- Groundworks
- Drylining
- Quanitity surveying
- Wall and floor tiling

Get full support from our team

We have a team of dedicated professionals who can help you along the way. We will also provide you with a toolkit worth over £200 and pay for all your essential training, CSCS card and PPE.

Secure full-time employment

By moving you among contractors, you will be able to learn different methods of construction and network with potential future employers. 95% of our apprentices go on to secure full-time employment, usually with somebody they have worked with during their apprenticeship.

Take advantage of new opportunities

There will be opportunities for you to influence how the scheme is run at our Apprentice Advisory Panel, attend career events or even get involved with charitable schemes such as Habitat for Humanity.

"My apprenticeship has given me the necessary skills to secure full-time work, which I feel I would have struggled to do without having chosen the apprenticeship route. It has taught me that employers have a certain level of expectation from you, so you need to go out there and go above and beyond to make a good impression. I don't think I would have developed a good work ethic and the right mentality that is expected of you without this experience."

Nathan Ackerman, Plastering Apprentice
